The bow of the ribbon is composed of two Half Square Triangle (HST) blocks made from the two 3.0” pieces. There are a variety of ways to make these, with a couple of links to examples here and here. The 3.0” size includes some allowance for final squaring of the HST blocks after they are sewn. Other HST methods may

require different sizes of cut fabric to start with. The final unfinished size of each HST should be 2.0” square.

The second row of the block including the bow should be assembled first so that any protruding corners of the HST blocks will be covered over by the adjoining rows.
